

Enhancing Science Instruction with Inquiry Challenges

Three graduate credit options are now available for the *Enhancing Science Instruction with Inquiry Challenges*, a three-day professional development institute for middle and high school science teachers. This institute delves into the use of inquiry challenges to investigate real-world essential questions. Inquiry challenges provide students with opportunities to investigate standards-based scientific concepts through extended inquiry. We will also explore how inquiry fosters the development of 21st century skills.

The institute is being offered at the following sites:

- Central Ohio: June 15—17, Ohio Resource Center, Columbus
- Southeast Ohio: June 16—18, Muskingum Valley Educational Service Center, Zanesville
- Southwest Ohio: June 24—26, Clermont County Educational Service Center, Batavia
- Northwest Ohio: June 24—26, Van Buren Local Schools, Van Buren
- Northeast Ohio: June 29—July 1, Youngstown State University, Youngstown

Cost: \$295, payable to OSU-Ohio Resource Center by purchase order or credit card. No refunds will be issued. Lunch will be provided.

Participants will be given a certificate of completion at the end of the program with professional development hours indicated.
